REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The present invention pertains to a circuit and method for reducing the time required to test embedded memory circuits by identifying a group of locations within a memory and compressing the failure information associated with those locations. The present invention recites features such as "sequentially obtaining columns of test information for each of a predetermined number of columns of memory locations within the memory apparatus; compressing the columns of test information according to associated groups of memory locations to produce a column of compressed test information; and based on the column of compressed test information, replacing a group of redundant memory circuits respectively associated with the predetermined number of columns of memory locations."

The prior arts of record (U.S. Patent No. 6,311,299 Bunker as an example of such prior arts) teach the use of data compression while testing embedded memory. However, the prior arts fail to teach "sequentially obtaining columns of test information for each of a predetermined number of columns of memory locations within the memory apparatus; compressing the columns of test information according to associated groups of memory locations to produce a column of compressed test information; and based on the column of compressed test information, replacing a group of redundant memory circuits respectively associated with the predetermined number of columns of memory locations." As such, modification of the prior arts of record can only be motivated by hindsight reasoning, or by changing the intended use and function of the prior arts

themselves. Therefore, it is not clear that one of ordinary skill in the art at the time of the invention would have made the necessary modifications to the prior arts of record to encompass the limitations set forth in the present application. Moreover, none of the prior arts of record, taken either alone or in combination, anticipate nor render obvious the claimed inventions. Hence, claims 1-24 are allowable over the prior arts of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
